

THE COMBUSTION INSTITUTE/CANADIAN SECTION

Annual Report, 2016
W. Kendal Bushe, PhD, Peng
Chair, Board of Directors

In the last two years, our section has held two annual Spring Technical Meetings. In 2015, we met at the University of Saskatchewan in Saskatoon, Saskatchewan and in 2016, we met at the University of Waterloo in Waterloo, Ontario. These meetings are held in the week after Mother's day with an evening reception on the Monday evening following an informal meeting of the Board of Directors; there are then two and half days of technical presentations, typically organized in two parallel sessions with the meeting closing for lunch on the Thursday. The majority of talks are given by graduate students, although each morning there is a plenary presentation given by a senior researcher – usually at least one of which is someone representing industry.

Our section recently decided to include the membership fee for the section in the conference fee for the Spring Technical Meeting; as such, everyone that attended the meeting is now effectively a member in the section. At the same time, we have accepted some applications for membership – and charged the same fee for these – through our web-site. At the most recent meeting in Waterloo, we had some 104 attendees; a further four people joined the section through our web-site; thus, we have 108 members at present.
