

THE SWEDISH SECTION FOR DETONICS AND COMBUSTION
affiliated with The Combustion Institute

Activity Report 2014 and 2015

Conferences

No conference arranged.

The Swedish Section has put a lot of effort into creating an international forum for exchange of information on technologies for peace, especially as regards clean-up of warfare areas, safe destruction and storage of munitions. An international conference was planned in combination with the 8th Disposal Conference this fall. However, those interested in that topic managed to create their own organization, the *Swedish Organization for Peace Technology* (SOFT), and will now run their International Conference on Peace Technology on their own. As a consequence, the 8th Disposal Conference (D 8), the planned launch pad for a peace technology conference series, is postponed; no date set at the moment.

Newsletters

In 2014 and 2015, seven newsletters in Swedish and (more and more; *vide infra*) English have been issued.

Members

The number of registered members during per today is 334. The number of international members has increased to 50, *i.e.*, 15 per cent, representing 16 countries.

Officers

Mr Ola Listh, president
Professor Dan Loyd, vice president
Dr Stig Johansson, secretary/treasurer
Professor David Lawrence
Mr Hans Wallin

Sweden, 29 June, 2016.
