

# **Post-Doctoral Research Position at Future Transport Power Laboratory at Korea Advanced Institute of Science and Technology (KAIST), Daejeon, South Korea**

Future Transport Power Laboratory, KAIST, is currently recruiting post-doctoral researchers. If you are interested or recommend potential applicants, please contact us using the following information.

## ■ Recruitment: **Post-Doctoral Researchers**

**At least 6 months of occupation must be possible. Work period and salary could be adjusted in maximum 3 years of occupation.**

- Conditions: Applying researcher must be eligible for minimum of 6 months. The work period could be adjusted as the researcher wishes under maximum 3 years of occupation.

- Research Topics:
  - Carbon-Neutral Energy Technology
  - Clean Propulsion Technology
  - Hybrid Powertrain Simulation
  - Renewable Alternative Fuel Application
  - Policies on Carbon-Neutral Energy Technology

- Qualification:
  - Sincere and passionate researcher with thermodynamic/ fluid dynamic/ energy related engineering knowledge
  - Research experience in computational fluid dynamics, Combustion, internal combustion engines is preferred

- Contact: Prof. Choongsik Bae  
Dept. of Mechanical Engineering, KAIST
