

Opening for Assistant/Associate Professor in Fire Protection Engineering at the University of Maryland

The Department of Fire Protection Engineering at the University of Maryland is pleased to announce an opening for a tenure-track faculty position.

The position requires an ability to teach at the undergraduate and graduate levels and to establish a successful, externally-funded research program. We seek someone who is excited to work with undergraduate and graduate students. Teaching experience and a background in fire protection engineering are desired but not required. Candidates with experience and interest in emerging fire safety research topics (including wildland-urban interface, electric energy storage, hydrogen storage, and mass timber buildings) and modern engineering tools (including computational fluid dynamics, artificial intelligence, machine learning, autonomous aerial systems, and advanced multimodal diagnostics) are encouraged to apply.

The department strongly encourages women and underrepresented minorities to apply, and it invites candidates who have a demonstrated commitment to working with diverse populations through research, teaching and mentoring to identify their experience in these areas.

For best consideration, applications should be submitted by 11/28/2023. Additional details are at <https://ejobs.umd.edu/postings/111664> and <https://fpe.umd.edu/news/story/applications-open-for-two-faculty-positions>.
