Other information you may want to report:

- The Hungarian Section is called in Hungarian "Magyar Égéstudományi Bizottság" (MÉB). The Section each year organizes a one-day conference called the "Xth MÉB Combustion Conference." Also, each year it holds a General Assembly meeting, where the Board accounts for the activity of the previous year and presents the plans for the next year. In this meeting, the Head of the Audit Committee reports the investigation of the Audit Committee on the previous year's financial activity of the Section. The Hungarian Section awards Student Prizes based on submitted 50-80 pages long project work reports in the field of combustion science. The Section regularly supports the participation of student members in the Combustion Symposia and the European Combustion Meetings by covering the registration fees.
