

**Postdoctoral Researcher - Experimental Shock Tube and Rapid Compression Machine Studies,  
Combustion Chemistry Centre, College of Science and Engineering**

**Ref. No. University of Galway 054-24**

Applications are invited from suitably qualified candidates for a full-time fixed term position as a Postdoctoral Researcher in Experimental Shock Tube and Rapid Compression Machine Studies at the Combustion Chemistry Centre, University of Galway.

This position is available immediately for one year and may be extended depending on funding availability.

The [Combustion Chemistry Centre](#), (C3) is engaged in fundamental research on the combustion of fossil and alternative biofuels. Combustion is the ultimate interdisciplinary field, it requires knowledge of chemistry, physics, fluid dynamics, thermodynamics and mathematics. C3 is concerned with the application of combustion research to the design of energy-efficient engine and gas turbine combustion systems and the impact of their use on toxic and greenhouse gas emissions, thus helping address the problems of urban air pollution and climate change.

**Job Description:**

The successful candidate will be a part of a research project on the combustion of liquid fuels. The techniques used in this project will include design of energy-efficient engine and gas turbine combustion systems.

**Duties:**

- Perform shock tube and rapid compression machine studies on fuels.
- Supervise and mentor PhD and undergraduate students in performing shock tube and rapid compression machine studies.
- Write and publish international peer-reviewed journal articles.
- Day to day responsibility for the performance of all duties associated with their research project, in recording, interpretation and validation of experimental data, and in dissemination of project results and outcomes.
- The post holder will ensure research programme requirements in terms of documentation of the project activities, milestones and major key deliverables are implemented and adhered to.
- The post holder will assist in the preparation of periodic scientific reports for this project, maintain confidentiality of background IP, foreground IP and research results, liaise with the members of the group, industry partners and TTO office on the identification of and patent protection of intellectual property generated in the work programme.
- The successful candidate will also represent the research activities of the C3 research group as required at local, national and international events (including talks, panel discussions and meetings with funding agencies, industry representatives etc).
- Any other duties assigned commensurate to this level of post

**Qualifications/Skills required:**

**Essential Requirements:**

- Candidates must have a PhD, or a PhD thesis submitted, in Combustion/Physical Chemistry or a related discipline (e.g. Mechanical Engineering).
- High level of experience and competence in combustion chemistry

- Experience and competence in using experimental combustion facilities.
- A demonstrated output in terms of published papers in peer-reviewed journals
- An interest in combustion
- Good writing and excellent communication skills are essential for this project, which will involve close collaboration with other members of C3 including industrial partners.

**Desirable Requirements:**

- Knowledge of experimental combustion facilities
- Ability to work independently and as part of a team
- Self-motivated, high level of initiative and excellent attention to detail.

**Salary:** Postdoctoral Researcher salary scale €42,782 to €54,965 per annum per annum, (subject to the project's funding limitations), and pro rata for shorter and/or part-time contracts.

The default position for all new public sector appointments is the 1st point of the salary scale. This may be reviewed, and consideration afforded to appointment at a higher point on the payscale (subject to the project's funding limitations), where evidence of prior years' equivalent experience is accepted in determining placement on the scale above point 1, subject to the maximum of the scale.

[Research Salary Scales - University of Galway](#).

**Start date:** immediately for one year and may be extended depending on funding availability.

**Continuing Professional Development/Training:**

Researchers at University of Galway are encouraged to avail of a range of training and development opportunities designed to support their personal career development plans. University of Galway provides continuing professional development supports for all researchers seeking to build their own career pathways either within or beyond academia. Researchers are encouraged to engage with our Researcher Development Centre (RDC) upon commencing employment - see [HERE](#) for further information.
